

DON - ADVANCED ODOUR NEUTRALISERS

A complete range of non-toxic biodegradable advanced odour neutralisers that can be dosed by any of the Dustquip fog or misting equipment to kill odours in all types of industries. Any unpleasant odours like ammonia, composting, organics from landfills or hydrocarbons in industrial areas can be easily treated with the new range of natural neutraliser agents by treating the surrounding air with infused mist.

- DON is not harmful to humans or animals in applied areas
- DON is available in different strengths depending on the equipment used
- DON is available for the 3 types of industrial odours
- DON can be distributed in sustainable multi-trip IBCs.

Sustainable Logistics

Dustquip can save you from unnecessary stockpiles of used IBCs by using our new Multi Trip purpose-built IBC that can be returned for a refill.

Speak to us about our service contracts that will help you with your sustainability goals.
